PROFILE

B.Tech Computer Science Engineering student at JECRC University who builds Android, web and AI products end to end — from visual identity and interface design to native Kotlin implementation and cloud-connected features.

EDUCATION

B.Tech, Computer Science Engineering — JECRC University, Jaipur

Class 12 (RBSE) — 76%

Class 10 (CBSE) — 83%

JEE Main — 76 percentile

PROJECTS

Golu AI — Kotlin · Jetpack Compose · Cloud AI · Cloudflare Workers

- AI companion Android app built from scratch with conversational interaction, voice capabilities and image understanding.
- Designed and built a custom native interface in Jetpack Compose connected to cloud AI services.

CampusConnect — Android · Kotlin · Jetpack Compose · UI/UX

- Student-focused campus platform concept bringing campus information, events, clubs, academic resources and student contributions into one app.
- Defined the product concept, information structure, core journeys and mobile visual system.

Synexa — Web Development · UI/UX · Visual Systems

- Web and product design project shaping a coherent digital experience from visual identity to interface structure.
- Built the visual direction, page composition and reusable product patterns.
